February 15, 2019

Dear Ms. Juelis,

It is our pleasure to invite you to join a congressional staff delegation trip to the United Arab Emirates (UAE) to study advanced energy technologies this April 12-18. Our aim is to strengthen the US-UAE energy relationship and demonstrate how a cohesive national energy strategy and concerted public-private effort can lead to impressive results.

The delegation will include staff from Congressional Leadership, staff from the US Senate Committees on Energy & Natural Resources and Environmental & Public Works, as well as the US House Committees on Energy & Commerce, Ways & Means, and Science & Technology, and personal office staff of members that sit on those relevant committees. You, along with your colleagues, play an instrumental role in driving American energy policy and international engagement and we believe this trip would provide you with an opportunity to learn more about the impressive advancement in energy one of our key allies in the Gulf has made and see some of its technologies and facilities firsthand.

Potential meetings include discussions with Mohamed Al Hammadi, Chief Executive Officer of Emirates Nuclear Energy Corporation; H.E. Suhail Al Mazrouei, Minister of Energy and Industry; H.E. Dr. Thani Ahmed Al Zeyoudi, Minister of Climate Change and Environment; Abu Dhabi National Oil Company executives focused on enhanced oil recovery (EOR), and others. Site visits will include: Sweihan Solar Project, Barakah Nuclear Facility, Masdar City, the Al Reyadah Carbon Capture and Storage (CCS) project, and Dubai Electricity and Water Authority (DEWA).

For further information or any questions you may have, please contact Jeremy Harrell at 535.403.4620 or harrell@clearpath.org. We sincerely hope you will join this trip in April.

Sincerely,

Abdulla Jassem bin Kalban, *Managing Director and Chief Executive Officer*, Emirates Global Aluminium

Emirates Global Aluminium (EGA) is the world's largest 'premium aluminium' producer and is the biggest UAE exporter outside of the oil and gas industry, producing 4 percent of the world's aluminum. EGA began in the 1970s when the UAE was exporting no aluminum and has transformed the industry to be a major player in the aluminum market. EGA currently operates smelters in Abu Dhabi and Dubai and is developing an alumina refinery in the UAE and a bauxite mine and export facility in the Republic of Guinea.

3:00 – 5:00 p.m. Site visit: Emirates Global Aluminium industrial plant

The EGA plant at Jebel Ali was built in 1976 and was the first aluminum smelter to be built in the UAE and the second in the region. When production began in 1979, the production capacity was 135,000 metric tons, but after eight expansions, this has increased to over one million metric tons of aluminum per year. This plant is capable of producing a range of purities of aluminum and can go as high as 99.96 percent, which makes aluminum for specialist aviation and electronics.
